Unit	Lesson	Objectives
Medical Terminology		
	Introduction to Medical Terminology	<p>Identify the origins of medical language.</p> <p>Recognize the four word parts and describe the use of the combining form.</p> <p>Build medical terms for specified definitions.</p>
	Common Medical Root Words	<p>Identify common medical root words.</p> <p>Build medical words based on roots, prefixes, and suffixes.</p> <p>Analyze medical scenarios based on root words.</p>
	Common Medical Prefixes	<p>Identify common medical prefixes.</p> <p>Build medical words based on roots, prefixes, and suffixes.</p> <p>Analyze medical scenarios based on prefixes.</p>
	Common Medical Suffixes	<p>Identify common medical suffixes.</p> <p>Build medical words based on roots, prefixes, and suffixes.</p> <p>Analyze medical scenarios based on suffixes.</p>
	Clinical Vocabulary	<p>Discuss the background and usage of clinical vocabularies.</p> <p>Identify clinical terminology related to coding and coding professionals.</p> <p>Apply knowledge of clinical vocabulary to medical scenarios.</p>
	Healthcare Record Terms	

Options EHS Medical Terminology		Scope and Sequence
Unit	Lesson	Objectives
		Define terminology related to healthcare records.
		Explain the adoption of electronic health records based on "interoperability."
		Interpret medical documentation based on healthcare record terminology.
	Health Information Technology Terms	
		Define health information technology.
		Identify terms and abbreviations related to health information technology.
		Explain how terminology affects the communication and documentation of health data.
	Medical Safety Terms	
		Identify terminology related to laboratory safety.
		Recognize safety practices in healthcare settings.
		Discuss medical procedures that require safety precautions.
	Medical Pathology Terms	
		Explain medical terminology and abbreviations related to pathology.
		Apply procedural terminology to practice medical scenarios.
	Medical Diagnostic Terms	
		Define medical terminology related to diagnostic procedures.
		Apply diagnostic terminology to medical scenarios.
	Unit Test	
	Medical Abbreviations	
	Healthcare Industry Abbreviations	
		Recognize healthcare delivery terminology.
		Identify abbreviations for regulatory agencies.

Options EHS Medical Terminology		Scope and Sequence
Unit	Lesson	Objectives
	Disease and Disorder Abbreviations	<p>Define terms related to healthcare systems.</p> <p>Identify common medical abbreviations for diseases and disorders.</p> <p>Identify abbreviations that are used for documenting diseases and disorders in the medical record.</p> <p>Apply knowledge of disease and disorder abbreviations to medical scenarios.</p>
	Patient Status Abbreviations	<p>Recognize abbreviations related to patient care.</p> <p>Identify abbreviations found in medical charts and medical orders.</p> <p>Analyze real-life medical scenarios involving patient care.</p>
	Healthcare Career Terms	<p>Define common healthcare career terminology.</p> <p>Distinguish terminology associated with healthcare providers.</p> <p>Combine word parts to form terms related to select health careers.</p>
	Unit Test	
Pharmaceutical Terms		
	Pharmacology Terms	<p>Define pharmacology.</p> <p>Identify terms related to the field of pharmacology.</p> <p>Distinguish among the various uses for pharmaceutical drugs.</p>
	Pharmaceutical Legislation, Manufacturing, and Testing	<p>Define terminology related to pharmaceutical legislation.</p>

Options EHS Medical Terminology		Scope and Sequence
Unit	Lesson	Objectives
		Identify abbreviations related to drug regulations, manufacturing, and testing.
		Recognize the meanings of the five drug schedules.
	Drug Forms and Administration	Identify the names and characteristics of manufactured drug forms.
		Analyze terminology related to the routes of administration.
		Recall the terms for the methods of administering intravenous medication.
	Prescription Terms and Abbreviations	Define the various components of prescriptions.
		Identify common abbreviations used with prescriptions.
		Interpret prescription orders based on real-life scenarios.
	Drug Class Terms	Define various drug classes.
		Match body systems to particular classes of drugs.
		Demonstrate knowledge of drug classes based on real-life scenarios.
	Unit Test	
Anatomical and Physiological Terms		
	Anatomical Terms	Define anatomy.
		Recognize anatomic structures of the human body.
		Define and spell terms related to body structure.
	Physiological Terms	Define physiology.

Options EHS Medical Terminology**Scope and Sequence****Unit Lesson****Objectives**

Identify terms related to human physiology and body structure.

Use physiological terms when describing body functions.

Body Regions

Identify human body regions.

Define appendicular and axial body regions.

Describe the anatomical position.

Directional Terms

Identify the terms used to refer to directions of the body.

Describe how the human body is organized.

Understand the relative location of body parts using directional terminology.
