

## SEED SURVEY NOTICE/INFORMATION

The Student Educational Equity Development (SEED) Survey gathers information about the educational experiences of students in Oregon. This information helps the Oregon Department of Education (ODE) to develop appropriate and targeted resources and supports for districts in Oregon. Responses to this survey will also inform ODE research and provide key insights from students that schools and districts can leverage to improve local education experiences. In compliance with HB 2656, districts must make the SEED survey available to all students in grades 3-11 who are enrolled in Oregon public schools or programs.

The content of the survey varies by grade level. The survey measures student perceptions in four core constructs:

- Access to learning resources
- Opportunity to learn
- Self-efficacy
- Sense of belonging

The middle and high school versions of the survey also include questions pertaining to extracurricular engagement and career and technical education. High school versions of the survey further include questions around post-graduation planning. A full list of survey items is available online under the “SEED Survey Items” heading on this page:
